

Senior Healthcare Support Worker: Diagnostic Imaging Support

 Level 3

21 Months On Programme
Including 3 Months EPA

Overview

The Digital Imaging Support aimed at those who are integral to patient care in a clinical setting. This apprenticeship equips individuals with the essential skills to conduct imaging procedures with an unwavering commitment to safety, quality, and patient well-being. Apprentices will learn to navigate the complexities of imaging equipment, differentiate between types of radiation for safe application, and ensure that patient care is optimised through meticulous procedural adherence.

Apprentices will benefit from an enriched learning environment that emphasizes practical skills, critical thinking, and a patient-centred approach. The outcome is a well-rounded healthcare support worker proficient in both the technical and compassionate aspects of patient imaging support, ready to take on enhanced roles and contribute to improved patient outcomes within their healthcare role.

Upon Successful Completion Of The Programme:

- Senior Healthcare Support Worker Apprenticeship – Pass or Distinction
- Level 2 English and maths (if not exempt)
- Level 3 Diploma in Healthcare Support
