Senior Healthcare Support Worker Apprenticeship Programme

Level 3

18 months

Occupation profile

Senior Healthcare Support Workers help registered practitioners deliver healthcare services to people. As an experienced support worker, you carry out a range of clinical and non-clinical healthcare tasks, under the direct or indirect supervision of the registered healthcare practitioner. You provide high quality, compassionate healthcare, following standards, policies or protocols and always acting within the limits of your competence. You may work in a range of services e.g. hospital, community, health or birth centre, someone's home, operating theatre, nursing or care home, hospice or GP surgery; working in partnership with families, carers and other service providers.

Theatre Support Workers look after people before, during and after operations. In most instances your supervisor will be a registered theatre nurse or an operating department practitioner. You will support people as they are preparing to go into theatre, reassuring them if they are anxious, and helping them move them back to recovery following their procedure. You will support the team that carries out the operations by carrying out a range of checks, such as checking individuals into the theatre department, preparing equipment, counting swabs or other instruments and measuring fluids. You may be involved in routine operations or traumatic and emergency surgery.

After a period of working and gaining experience, you may be able to work towards an Assistant Practitioner post or apply to university to become a registered healthcare practitioner.
